

STRUCTURED, SOFT &
MULTI-DIMENSIONAL

HeartFelt® Ceilings & Walls

Straight lines, clean visuals and all the warm, fuzzy feelings

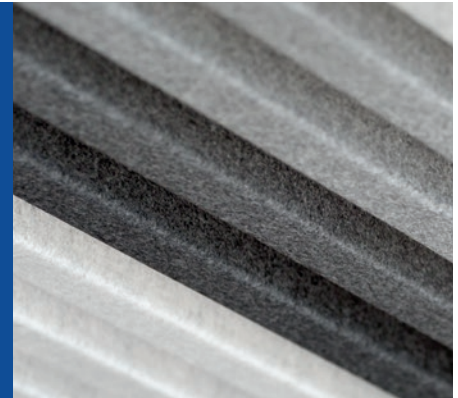

Available in a Linear format for crisp lines, in Levels for distinctive dimensionality, and in Round for a subtly rippled aesthetic, HeartFelt® modular ceilings transform the soft texture of a time-tested material into a format that's perfect for creating warm, modern spaces.

HEARTFELT CEILING & WALL SYSTEMS FEATURE:

- Unique felt roll-formed modular ceiling panels that warm both the visual and acoustical experiences of a space
- A variety of standard and custom seismic carrier systems engineered to offer versatile aesthetics and acoustical performance options
- Health-friendly construction with low VOCs for improved indoor air quality, plus eco-friendly design featuring 100% recyclable construction
- Easy installation access and compatibility with standard electric, HVAC, and plumbing components

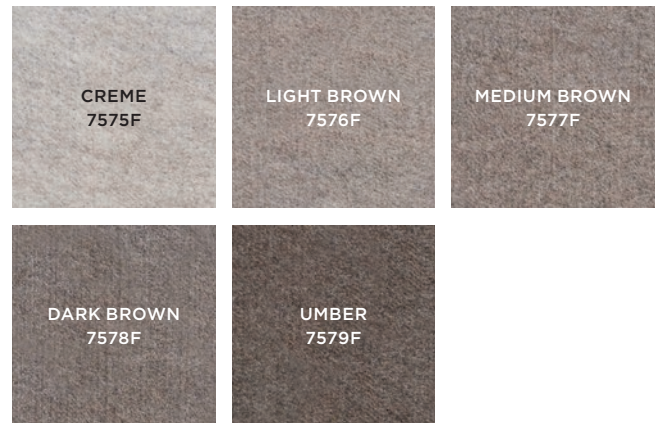

A palette of timeless neutral tones that go with everything but never go out of style

PANELS & CARRIERS DESIGNED FOR VERSATILITY

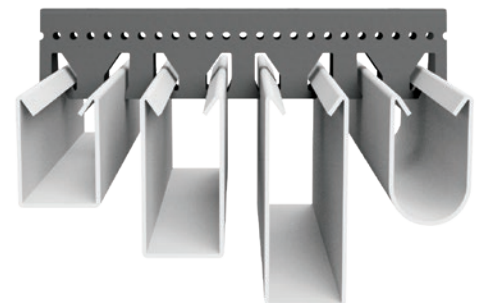

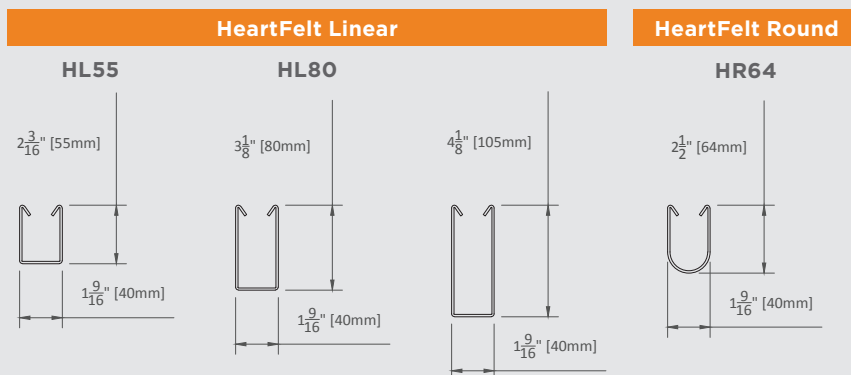

Standard dimensions: 8' panel lengths

- » HeartFelt: 1-9/16" x 2-3/16" (40 mm x 55 mm)
- » HeartFelt Levels: 3-9/16" to 4-9/16" with up to 1" reveal
- » HeartFelt Linear: 1-9/16" x 2-3/16" (40mm x 55mm)
 1-9/16" x 3-1/8" (40mm x 80mm)
 1-9/16" x 4-1/8" (40mm x 105mm)
- » HeartFelt Round: 1-9/16" x 2-1/2" (40mm x 64mm)

Three standard carrier modules:

PANEL SPACING	OPEN AREA	REVEAL	ACOUSTICS
60mm (2 3/8")	33%	13/16"	NRC 0.60
80mm (3 1/8")	50%	19/16"	NRC 0.50
100mm (3 15/16")	59%	2 3/8"	NRC 0.45

Custom carrier modules also available

Soft to the touch, softer on the ears

Felt's dense, highly textured construction makes it excellent for sound absorption, water-resistance, and cutability — all while creating an irresistible cozy-meets-chic style.

HeartFelt® panels bring visual warmth, acoustical value and long-lasting performance to offices, schools, hospitality, and other spaces. End caps are available to finish off panels and complete the look.

With rounded panel profiles, HeartFelt® Round achieves a warm rippled effect

...but not soft on performance

Superior acoustic control

Up to NRC 0.70, perfect for commercial and educational applications

Fast, easy installation

Lightweight panels are easily field cut and clip into modular carrier systems

Fire-resistant materials

U.S. Class A Fire Rated per ASTM E84 and Canada CAN/ULC S102.2-10

Fade-resistant colors

Greys and earth tones with staying power that won't diminish over time

Low maintenance

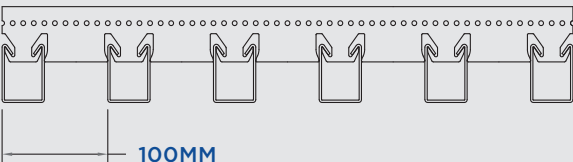

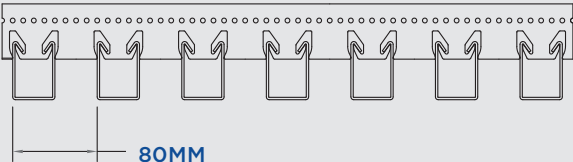

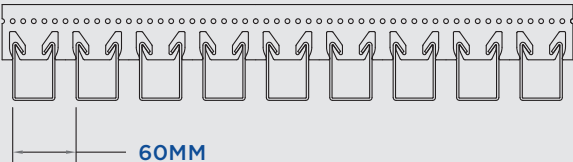

Provides easy plenum access and no special cleaning required

Take Felt even further with a variety of standard and custom carrier systems for unlimited configuration options.

HEARTFELT LINEAR

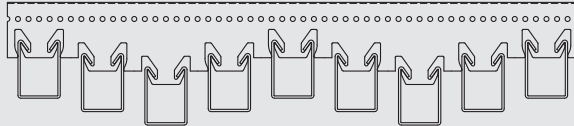

A variety of carrier spacing options add to the design versatility, from the standard 60mm, 80mm, and 100mm options to custom 50mm, 70mm, and 90mm, and even one-of-kind spacing creations.

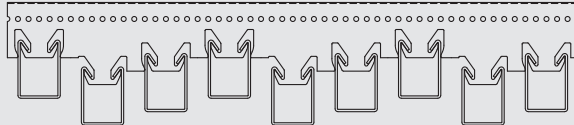

HEARTFELT LEVELS

Achieve greater dimensionality with HeartFelt Levels carriers and explore new ways to vary panel depths and reveals while creating stunning ceiling spaces.

Tones designed to be combined

The cool, steely grays and warm, natural earth tones of the HeartFelt® color palette are designed to work in conjunction with one another to create powerfully understated monochromatic effects, with fade-resistant colors that won't diminish over time.

USE COLOR AND TONE TO CREATE PATTERNS, GRADIENTS, STAGGERED LOOKS AND OTHER UNIQUE VISUALS

Stadskantoor Hengelo, Hengelo NL | Architect: EGM Architecten

nHOW RAI, Amsterdam, NL
Architect: Office for Metropolitan Architecture (OMA)

Get staggering results

Use the power of space and depth to your advantage. Versatile carrier options for panel spacing variation, plus a limitless array of depth configurations, can make your ceilings mesmerize with movement.

8 Waunakee Public Library, Waunakee, WI

Explore parallel dimensions

It's not always about straight lines. Play with angles. Sing with slopes. Create curiosity with curves. Add dimensionality to your installations by using 360 degrees of the ceiling space.

Clouds & Pods: shapes that define space

Blend the linearity of HeartFelt® panels with the free-hanging format of Clouds and Pods in organic circles and geometric rectangles.

SEAMLESSNESS, DURABILITY & LIGHTING

Transition seamlessly from walls to ceilings with fast, easy installations

Thanks to its robust structure, felt panels bounce back, which makes them an ideal wall material, even in active environments

Add an element of playfulness with colored under-lighting; light reflectance varies with color selected.

Bearing Point, Paris FR | Architect: STUDIOS architecture Paris

Style it naturally

The organic feel of felt and earthy color palette of HeartFelt make it an ideal fit for designing spaces with biophilic aesthetics.

HeartFelt panels contribute to health and sustainability efforts. All HeartFelt products contribute to improved indoor air quality and are Certified GREENGUARD Gold. And with 100% recyclability, they are also Cradle to Cradle™ Certified Bronze.

Centre Coca Cola Oberhausen | Architect: Saguez Paris

Buildings and all that go into them—from the raw materials, to the design of the structure, to the lifecycles of components—have an impact on the well being of people and the environment. CertainTeed Architectural shares the responsibility to make a sustainable difference in as many ways as possible.
